

## Letter of Recommendation from Qasky

[October 26, 2025]

To Whom It May Concern,

On behalf of Qasky, a leading quantum technology company in China specializing in quantum communication, quantum security, and advanced quantum solutions, we are pleased to express our strong support for the ongoing technical and educational initiatives led by the Thai Quantum Information Forum (Q-Thai.Org) in Thailand.

Qasky has been following the development of Q-Thai.Org with great interest and admiration. The organization's continuous contribution to building awareness, technical capability, and research collaboration in quantum science and technology across Thailand reflects a shared vision with Qasky—to promote the practical application and sustainable development of quantum technologies for national and global benefit.

We highly appreciate Q-Thai.Org's achievements in two major aspects as on "Establishing a National Quantum Knowledge Center". Q-Thai.Org has successfully created a collaborative platform that serves academia, industry, and public sectors by collecting, managing, and disseminating essential quantum-related knowledge and resources. This initiative provides a solid foundation for the country's quantum ecosystem and accelerates the transformation from research to real-world applications. Also, "Organizing High-Impact National Workshops and Educational Events" through its annual programs, workshops, and seminars, Q-Thai.Org consistently delivers high-quality training and public engagement, nurturing young talent and promoting understanding of quantum technologies among professionals and students alike.

We recognize the leadership and dedication of Assoc. Prof. Dr. Supab Choopun (Chiang Mai University) and Dr. Keattisak Sripimanwat (IEEE Thailand Section Quantum IT Group), whose vision and coordination have been central to these successes.

Qasky firmly believes that Q-Thai.Org plays a vital role in advancing quantum education and public engagement in the region. We sincerely recommend the organization and its leadership for any future collaboration, partnership, or recognition that can further strengthen their mission of expanding quantum knowledge and applications in Thailand and beyond.

Sincerely,

Dr. Jie Ling, Chairman of QASKY
