

Letter of Recommendation from Fundacja Quantum AI

October 31, 2025

To Whom It May Concern,

On behalf of **Fundacja Quantum AI**, a distinguished non-profit organization dedicated to advancing the education, implementation, and research of quantum technologies, I am writing to offer my unequivocal support for the ongoing technical and educational activities of the **Thai Quantum Information Forum (Q-Thai.Org)** in Thailand.

Fundacja Quantum AI has closely observed and highly values the strategic efforts and tangible impact achieved by Q-Thai.Org. We recognize the organization's pivotal role as a national focal point for quantum science and technology dissemination, which aligns perfectly with **Fundacja Quantum AI's** mission of making quantum knowledge accessible and fostering a global quantum workforce.

We particularly commend Q-Thai.Org for its excellence in two critical areas:

1. **Establishing a Knowledge Management Center:** Q-Thai.Org has successfully functioned as a vital hub for collecting, curating, and sharing essential quantum information and resources, serving the academic, industrial, and public sectors across Thailand. This infrastructure is crucial for national capacity building and bridging the gap between foundational research and practical implementation.
2. **Organizing High-Quality National Annual Workshops, Seminars, and Lectures:** The consistent execution of these educational events is instrumental in maintaining momentum, updating the community on the latest advancements, and nurturing the next generation of Thai quantum enthusiasts and professionals.

The dedicated leadership driving these successful initiatives—including **Assoc. Prof. Dr. Supab Choopun** (Chiang Mai University) and **Dr. Keattisak Sripimanwat** (IEEE Thailand Section Quantum IT Group), alongside their dynamic team.

We strongly believe that the activities spearheaded by Q-Thai.Org are invaluable assets to the global quantum education movement and deserve substantial and continued support. We confidently recommend Q-Thai.Org and its leadership team for any recognition, partnership opportunities, or general support that will enable them to expand their crucial mission.

Sincerely,

Dr Paweł Gora
